

EUROPE SOLAR SUPPLY CHAIN MAP

Edition 1 - 2025

© STATEMENT OF CONFIDENTIALITY

This presentation and supporting materials contain confidential and proprietary business information of Sinovoltaics Group Limited.
These materials may be printed or photocopied for use in evaluating the proposed project, but are not to be shared with other parties.

ABOUT US

Since 2009, Sinovoltaics, a Dutch-German solar PV and BESS technical compliance and quality assurance service firm has been a pioneer in the solar photovoltaic and BESS industries.

With our AI-based SELMA software and industry leading Zero Risk Solar® guarantee, our mission is to eliminate all PV & BESS product defects, enabling investors and the world to succeed with minimal investment risks.

We have inspection teams located in Mainland China, Vietnam, Thailand, India, Türkiye, and the United States. They are ready to visit your supplier factory.

INTRODUCTION

Sinovoltaics Solar Supply Chain Maps

Dive into the heart of the solar industry, exploring the latest maps showcasing existing and future solar module manufacturers alongside their critical suppliers in solar cells, wafers, ingots, and polysilicon.

Key Features:

- **Region-Specific Maps:** Tailored for each thriving solar market - North America, Europe, Southeast Asia, and India.
- **Manufacturer Directory:** Access up-to-date information on solar manufacturers operating in each region. Stay ahead of the curve by understanding the key players in each market.
- **Expansion Tracking:** Stay informed on industry growth with real-time updates on which manufacturers are currently building new facilities.
- **Comprehensive Updates:** Our dedicated team ensures that the solar supply chain maps are refreshed every 4 months, offering the latest information on evolving market dynamics.

Sinovoltaics' Solar Supply Chain Maps empower you with the knowledge needed to navigate the global solar landscape effectively. Download the latest maps now and stay ahead in the race to harness the potential of solar energy.

May 2025

The Sinovoltaics Supply Chain Map (SSCM) - Europe for Edition 1 2025 includes several notable changes since our last report.

Thanks to market feedback, the 2025 first edition of the Europe, Mediterranean & Turkey Solar Supply Chain Map has some notable revisions and additions.

In general, the EU market is facing challenges with several bankruptcies. The EU's opportunities are now aligned with the Clean Industrial Deal proposed by the EU Commission, which should help revitalize the Solar PV manufacturing in Europe, although more support measures will still be needed.

To recap the latest updates:

EU Module Manufacturing

- Kivanc has been added to this edition of Sinovoltaics' Solar Supply Chain Map. Their goal is 1.2 GW of module production and 5 GW of cell manufacturing.
- Elite Solar is looking to manufacture 8 GW in Egypt.
- SC Heliomat is aiming to manufacture 1.5 GW in Romania.
- Sunart PV Enerji has also been added to the Map with 300 MW of production in Turkey.
- EDF decided to shut down Photowatt and Systovi has also gone into liquidation.
- RECOM Silia has also halted their production in France.
- Gest Enerji, Suoz Energy Group and Solar Turk have closed their doors in Turkey.
- Innolane has gone bankrupt in the Netherlands.
- Solarwatt has also decided to close its manufacturing site in Dresden, Germany.
- Despite previously announcing 5 GW of production in Belgium and Georgia, Belinus has also gone bankrupt.
- Energetica filed for insolvency in December 2023.

Cell

- Meyer Burger has stopped module production but is retaining its 500 MW cell production facility in Switzerland. There are ongoing negotiations with bondholders about restructuring.

Polysilicon/Ingot

- Norwegian Crystal went bankrupt in August of 2023. Also, NorSun discontinued manufacturing in Norway along with REC, abandoning their polysilicon factory in Norway in 2023.

Currently Europe, the Mediterranean, and Turkey have a combined nameplate PV module production capacity of 21 GW and ambitions to jump towards 70 GW by roughly 2030. The larger portion of the region's manufacturing hub is in Turkey.

The current combined nameplate cell capacity is 3.2 GW, but press releases indicate the capacity may grow to 55 GW by 2030.

This increased cell capacity coincides with an ingot growth from 1.5 GW to 24 GW by the same time period along with 126700 metric tonnes of Metallurgical Grade Silicon (MGS).

SOLAR SUPPLY CHAIN EUROPE

LEGEND

- Module capacity (GWp)
- Cell capacity (GWp)
- Wafer capacity (GWp)
- Ingot
- Polysilicon capacity (GWp)
- MGS (Metric tonnes)
- List of factories from the same Country
- Bankrupt, halted or closing production

ARE YOU A SOLAR MANUFACTURER?

In our next edition of the Europe Solar Supply Chain Map, we aim at listing how procurement stakeholders can contact each factory.

Do not hesitate to reach out at contact@sinovoltaics.com so we can list your contact details.

Also, if your solar manufacturing project is not listed or has been updated, please contact us and share your latest ambitions. We will include it in our next release.

SOURCES

The report presents data compiled from various sources, including publications, market reports, manufacturer press releases, and Sinovoltaics' direct relationships with manufacturers. We extend our gratitude to these valuable data contributors.
